

Ryan Tate Proposal:

I am proposing to donate a mural to the City of Rogers at the Roger Skate & Splash Park. The mural will depict a scene of skateboarding aliens enjoying the City of Rogers. For materials, I will be using UV resistant acrylic paint with a protective layer of anti-graffiti coating.

Timeline will depend on the weather. I will need to test the paint in the cold to make sure it dries alright before starting (if it does not, I may wait until spring to ensure that it does not crack). I'll start the mural by using a projector to outline, so that it will be at night, then I hope to complete during the day on my days off in the week or so following.
